Kerish Products presents a new version of Kerish Doctor 2014, a comprehensive computer maintenance solution

December 25, 2013

The Kerish Products team announces the availability of v4.55 update for Kerish Doctor 2014, a comprehensive computer maintenance solution.

The product is a unique tool kit intended for automatic maintenance of computers running on Windows.

The program prevents crashes, fixes Windows errors, removes digital "trash", optimizes and protects the system.

The new version features an updated crash prevention component called "Real-time Failure Detection System" that is capable of detecting and fixing problems related to hardware components. This includes a broad range of issues, starting from hardware failures (printers, CD/DVD drives, keyboards, mice, etc.) to problems pertaining to hardware identification by the operating system.

Apart from this, the new version comes with a number of new tools and improved integration with Windows.

Additional information about the system and the latest version of the product can be found at www.kerish.org.
