Kerish Products introduces a new version of its comprehensive solution for computer maintenance "Kerish Doctor 2014"

July 31, 2014

Kerish Products' development team announces an upgrade to its comprehensive solution for computer maintenance "Kerish Doctor 2014" up to version 4.60.

The product is being promoted as a combination of "repair + cleaning + optimization + protection" that prevents failures, corrects system errors, cleans up digital "trash" and optimizes and protects your computer.

The new version includes remote data recovery, a file unlocker, computer configuration information and analysis, as well as a host of other useful tools.

Correction of registry errors is now 25-30% more effective, and error correction for popular web browsers has been added.

Software integration with Windows OS has been improved, computer protection has been improved, new guidance and numerous other innovations have been added.

You can find additional information and download the latest version of this product at www.kerish.org.
